EN ISO 14123-1, -2	Reductions of risks to health resulting from hazardous substances: Principles and specifications, verification
EN ISO 14159	Hygiene requirements

Ergonomic hazards

EN 547-1	Openings for whole body access
EN 547-2	Access openings
EN 547-3	Anthropometric data L'ergonomie Un facteur de succès pour toutes les entreprises www.suva.ch/44061.f
EN 614-1/2	Ergonomic design principles – Terminology, general principles, interactions between the design of machinery and work tasks
EN 894-1, -2, -3, -4	Displays and control actuators
EN 1005-1, -2, -3, -4	Human physical performance, manual handling, force limits for machinery operation, working postures and movement in relation to machinery Manutention des charges www.suva.ch/88190.f
EN 1837	Integral lighting of machines
EN 14738	Anthropometric requirements for the design of workstations at machinery Aménagement ergonomique des postes de travail www.suva.ch/44075.f

Mechanical engineering product safety – we can help.

We can answer your questions on the following topics:

- CE conformity
- European directives and standards
- Safety of machines and control systems

We can provide you with:

- Type-examinations
- Assessments of machinery protective measures
- Seminars on product safety

Benefit from our years of experience, our up-to-date knowledge and visit your website: www.suva.ch/certification-e

Safety of machinery - Important type-B standards

Overview of frequently used type-B standards with additional information

CERTIFICATION

The Technical Report ISO/TR 22100-1 recommends the following steps for the practical use of the type A standard EN ISO 12100 and existing type-B and type-C standards for risk reduction:

Source: ISO/TR 22100-1:2015 How ISO 12100 relates to type-B and type-C standards

If there is no machinery safety standard for a machine (type-C standard), chapter 6 of the EN ISO 12100 standard describes protective measures to reduce risks.

Detailed safety aspects and requirements for safeguards can be taken from type-B standards.

This publication gives an overview of frequently used type-B standards depending on the existing hazard. For the exact title of the existing standard, see the current excerpt from the Official Journal of the European Union.

https://ec.europa.eu/growth/single-market/european-standards/harmonised-standards/machinery_en

This document also contains references to publications related to the subject of the standards.
