

We certify your products

suvapro
working safely

Innovation + Safety = Success

Your innovation combined with our safety expertise is your guarantee of a successful product. You can rely on Suva's extensive experience in CE conformity and safety standards.

Are your products safe?

In Switzerland, the same safety provisions apply for machinery and many other products as in the European Union (EU) and the European Economic Area (EEA). As a manufacturer, you are responsible for the safety of your product.

Why is CE conformity necessary?

Within the EU, the EEA and Switzerland, products must comply with the essential health and safety requirements. The manufacturer confirms the fulfillment of these requirements with his EU declaration of conformity.

What does a type examination certificate do?

A type examination checks and certifies that a product meets the essential requirements with regard to safety and health protection. For you as a manufacturer, this is a powerful selling point. After all, customers are paying more and more attention to safety when it comes to buying machinery.

Our services at a glance:

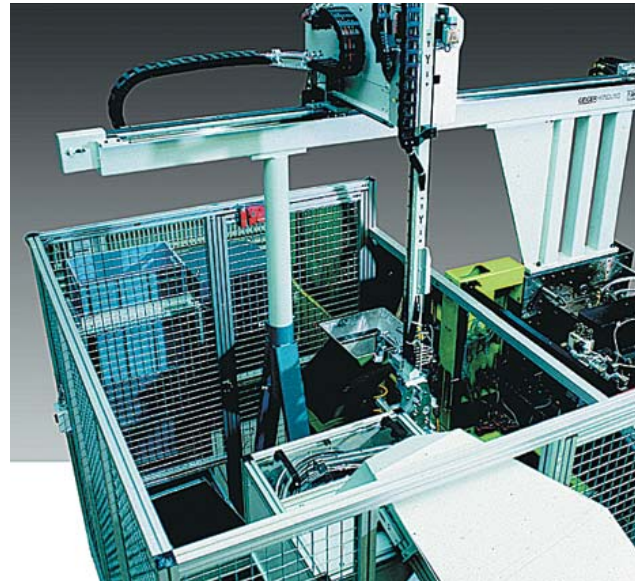

- Type-examinations of machines (page 3)
- Type-examinations of safety components and safety controls (page 4)
- Type-examinations of low voltage switchgear and controlgear (page 4)
- Type-examinations of personal protective equipment against falls from a height (page 5)
- Type-examination certificates (page 6)
- Our Strengths (page 7)
- Customer Confidence (page 8)

Type-examinations of machines

Examples from our area of expertise

Injection moulding machines

Handling robots

Building hoists

Storage and retrieval machines

Type-examinations of safety components, safety controls and low-voltage switch-gear and controlgear

Examples from our area of expertise

Pressure-sensitive edges: sensors

Pressure-sensitive edges: control units

Contactors

Switch-disconnector

Type-examinations of personal protective equipment against falls from a height

Examples from our area of expertise

Anchor device

Belt for work positioning and restraint

Anchor points for photovoltaic installations

Guided type fall arrester

Type-examination certificates

With type-examination certificates issued by SuvaPro CERTIFICATION, manufacturers can offer proof that an accredited European notified body has established that their products comply with the requirements for placing on the market.

This is a convincing sales argument, as companies are compelled by law to use safe products. When purchasing machines, customers are thus devoting more attention to product safety.

Our certificates are recognised throughout the European Economic Area and are published on the Internet at www.suva.ch/certification-e.

CERTIFICATION

Type-examination certificate no. E 99999.e

Object: Press

Make: Safepress

Type designation: MP 2000

Technical details concerning safety: Technical file no. 2017-159 dated 19.06.2017

Manufacturer's address: Safepress AG
27 Sample Road
CH-9999 Anywhere

Applicants's address: Machinery Trade Ltd.
Fabrikstrasse 11
CH-6001 Lucerne

Special conditions, -

Expires on: 31 July 2022

The prototype examined corresponds to the basic requirements of Directive 2006/42/EC and the amendments of the European Parliament and the Council of 17 May 2006 for the harmonisation of Member States' legal and administrative regulations relating to machinery.
This certificate is valid in conjunction with the general conditions listed on the back and any possible enclosures mentioned above.

European notified body, identification number 1246

Place and date: Lucerne, 3 July 2017

Our Strengths

Suva has many years of experience in product certification.

The European Union recognises SuvaPro CERTIFICATION as a notified body (identification number 1246).

Our safety engineers collaborate actively on CEN's (Comité Européen de Normalisation) and CENELEC's (Comité Européen de Normalisation Electrotechnique) European standards committees, as well as on various national and international working groups.

We also participate regularly in the committees of the notified bodies.

Furthermore, Suva is accredited (under number SCESp 0008) by the Swiss Accreditation Service as a conformity assessment body for machinery, low-voltage switchgear and controlgear, and personal protective equipment against falls from a height.

Suva

Active since 1918, Suva currently employs some 4200 people at its head office in Lucerne, 18 agencies across Switzerland, and its two rehabilitation clinics in Bellikon and Sion. As an independent company under public law with 4.1 billion Swiss francs in premiums, Suva insures around 127 900 companies and two million employees against the consequences of occupational accidents and diseases. It automatically covers unemployed citizens and has also overseen military insurance on behalf of the Swiss Confederation since 2005. Suva's services include prevention, insurance and rehabilitation. Operating independently and without public funding, it returns its profits to insured parties in the form of lower premiums. Social partners – including both employers and employees, along with the Swiss Confederation – are represented on the Suva Council.

Customer Confidence

Why do manufacturers send their applications to us?

Although it is ultimately up to manufacturers to ensure product safety, there is always the option of having products voluntarily assessed by an accredited certification body. As manufacturers are responsible for every aspect of their products, confirmation from an independent body that they comply with the applicable directives and regulations provides additional security.

The Suva model

The four pillars of Suva

- Suva is more than just insurance: it brings prevention, insurance and rehabilitation together under one roof.
- Suva is managed by the social partners. The balanced composition of the Suva Council, which consists of representatives of employers, employees and the Swiss Confederation, permits widely supported, sustainable solutions.
- Suva returns any profits to its insurees in the form of lower premiums.
- Suva is self-supporting and does not take public money.
