

Live-Stream setup for demo (EN)

Live-Stream setup for demo (1/2)

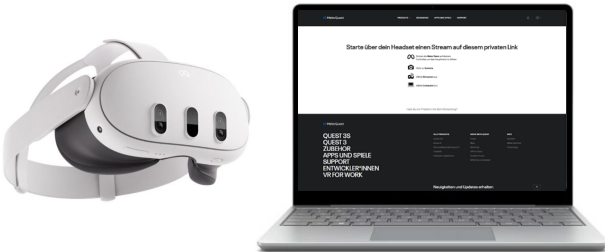

1. Open Meta-Casting and log in

Open the following link on your laptop/PC and log in with your Meta account

<https://www.oculus.com/casting>

2. Private link created for streaming

A private link for streaming has been created

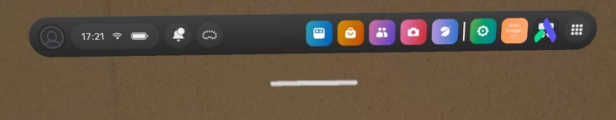

Note:
Make sure that you use the same **meta account** and **network** for both end devices!

3. Switch on VR headset

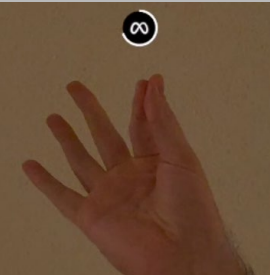

Press and hold the «On» button for at least 4 seconds

4. Menu bar (Passthrough)

You see the real environment with a virtual **menu bar** floating in space

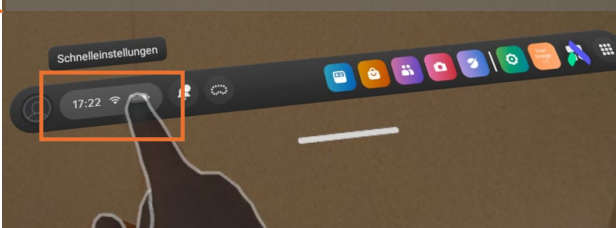

NOTE on the menu bar

If the menu bar is not visible:

- Open menu bar → «Bring thumb and index finger together **2x quickly and open**»
- Realign open menu bar → «Bring thumb and index finger together and hold» (reference image)

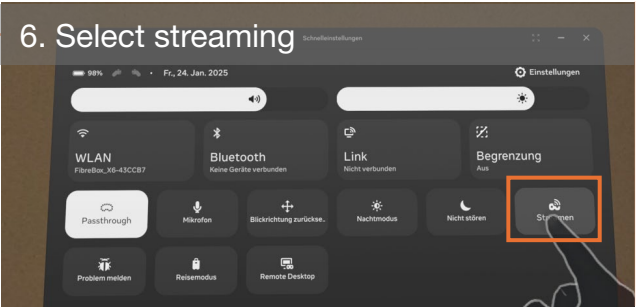

5. Select quick settings

Select the «**Quick settings**» button in the menu bar

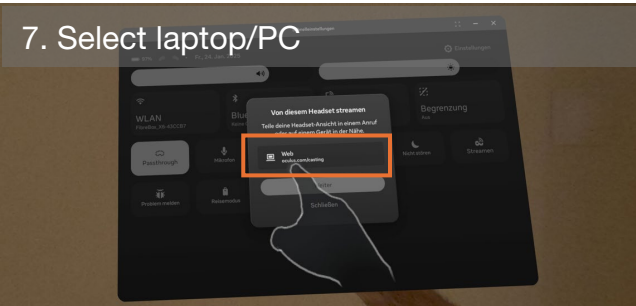

Live-Stream setup for demo (2/2)

6. Select streaming

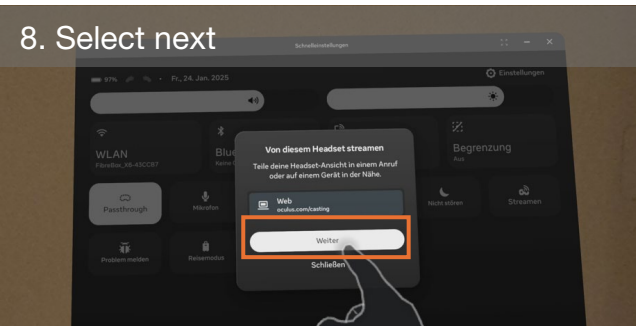

Select the **«Stream»** button in the window

7. Select laptop/PC

Select the **«Laptop/PC»** displayed in the window

8. Select next

Select the **«Next»** button in the window

9. Live stream produced

Return to the browser. The live stream of the VR headset is now being streamed

Note:
Use the full-screen mode for presentation purposes

NOTE for the live stream

Connect your laptop or PC to a monitor via HDMI cable to display the live stream from the VR glasses on a larger screen
