

Create a safer working environment

1. Free walkways

Always keep walkways and aisles free.

2. Open drawers

After being opened, drawers should always be closed again.

3. Exposed cable channels

Cover exposed cable channels or mark them if this is not possible.

4. Spilled liquids on the floor

Wipe up spilled liquids as quickly as possible.

5. Mark uneven walking surfaces

Uneven walking surfaces of every sort should be clearly signed.

6. Temporary solutions

Machinery and cabling that have been set up provisionally can become invisible over time. Mark these clearly or tidy them away.

7. Bunched-up carpeting

Bunched-up carpeting or raised edges can lead to unfortunate accidents.
